

*Compliance Designs*

**CLIENT:** Wilderness Asset Holdings, LLC  
1593 Wilderness Road  
Bland, VA 24315

**DATE OF REPORT:** Quarter 1, 2026  
**REPORT #:** 1265-343  
**LABORATORY ID#:** 380-199337-1

**NOTE:** “\*\*” indicates that maximum levels have been exceeded, or in the case of pH, is either too high or too low  
“ND” indicates that none of these analytes have been detected at or above the specified detection level  
“MCL” indicates maximum contaminant level as established by US FDA for bottled water  
“RL” indicates laboratory reporting limit for method  
Units results are reported in mg/L unless otherwise noted

EPA approved methods were used in all of the analyses and a listing is available upon request. These test results may be used for compliance purposes as required.

<sup>1</sup> The EPA, some State agencies and/or the IBWA may have established alternate MCLs for some of these analytes. Please refer to Federal, State and Industry codes.

<sup>2</sup> Fluoride MCL is determined by annual average of maximum daily air temperatures where the bottled water is sold. Refer to tables found in 21 CFR 165. The MCL for bottled water to which Fluoride has been added is 0.7 mg/L.

<sup>3</sup> Mineral water is exempt from allowable levels per 21 CFR 165.110(b)(3) and (4). The exemptions are aesthetically based allowable levels and do not relate to a health concern.

<sup>4</sup> MCL established by US FDA for waters that meet the US FDA definition of "Purified" is 5-7 pH Units per the USP XXIII Standards, as referenced in 21 CFR 165.

<sup>5</sup> The bottled water shall not contain beta particle and photon radioactivity from man-made radionuclides in excess of that which would produce an annual dose equivalent to the total body or any internal organ of 4 millirems per year calculated on the basis of an intake of 2 liters of the water per day (= 50 pCi/L).

<sup>6</sup> The EPA has a recommended Secondary Maximum Contaminant Level (SMCL) range of 0.05 to 0.2 mg/L for Aluminum.
