How To Read Your SimpleLab PDF Report

Your results are being evaluated against the Health Guidance Level.
This is a health protective, non-enforceable drinking water benchmark. HGL is based on the most protective human health benchmark used among public health agencies for a contaminant. Drinking water at or near the HGL over the course of your lifetime is thought to be safe.

MDL: The Method Detection Limit is the lowest concentration which the analysis team and instrumentation is configured to measure.
RL: The Method Reporting Limit is the lowest level at which the laboratory can confidently and accurately quantify the concentration.
**Analyte was detected below the reporting limit. The value shown is an estimate.*
